

The Challenge

Organizations utilize processes and technology to effectively manage mission critical content and collaboration. At the same time they must achieve transparency across the enterprise in order to reduce costs, reduce risk, and achieve a competitive advantage.

Most companies implement content management systems from a departmental or business perspective, leaving the organization with various disparate content repositories without leveraging common functionality.

ConVerge® Solution Suite

ConVerge® brings together ECM best practices and best-of-breed technologies into one solution suite. Built on the Microsoft® SharePoint® 2010 platform, ConVerge provides organizations with the ability to manage all aspects of content within the enterprise with a robust, high-quality, scalable, flexible, and supportable solution suite that can be implemented efficiently and affordably. Each pre-configured business solution is built upon the ConVerge Compliance platform, which provides common functionality that is both extensible and regulatory compliant.

Benefits

- ✓ Pre-configured modules with industry best practices
- ✓ Rapid deployment with ensured regulatory compliance
- ✓ Robust, high-quality, scalable, flexible, and supportable
- ✓ Reusable and extensible functionality
- ✓ No ongoing license fees
- ✓ Validation package available
- ✓ Third party integration designed for reusability across the enterprise
- ✓ Built specifically for SharePoint 2010
- ✓ Faster user adoption with familiar user interfaces of SharePoint and Microsoft Office
- ✓ Improved ROI and lower total cost of ownership
- ✓ Architected for global environments
- ✓ Accelerated reviews and approvals
- ✓ Improved cross functional collaboration
- ✓ Faster preparation of documents and associated changes
- ✓ Real-time, automated dissemination of content to target audiences and/or websites
- ✓ Reuse of existing content
